ZEN COOK, writing a new chapter in Ttukbaegi

Processed at super high temperature of 1250 ° C for three times and use of High heat resistive materials make ZEN COOK very durable in everyday use even in extreme thermal condition (thermal shock proof up to 400° C). Once heated, ZEN COOK retains heat very well keeping food warm for longer on table, and you can decorate your table in style with ZEN COOK' s trendy design at the same time.

- ▶ **No detergent residue!**
Use ZEN COOK with a peace of mind. No detergent residue will remain after wash.
- ▶ **Health**
IH compatible ZEN COOK will keep you away from Carbon Monoxide poisoning
- ▶ **Economy**
IH version use less energy compare to conventional gas stove and electrical range (halogen, high-light)
- ▶ **Hi-Tech**
Made of high heat resisting material, ZEN COOK can withstand sudden temperature change up to 400° C. Multi-layered heating elements are securely placed inside the bottom surface transferring the heat directly to food inside
- ▶ **Eco-friendly dinnerware**
ZEN COOK is made of highly purified natural minerals harmless to humans and without heavy metals. This feature makes ZEN COOK eco-friendly product satisfy food hygiene regulation and various global safety standards.

▶ No more detergent absorption!

Use ZEN COOK with peace in mind that it will not absorb any detergent.

▶ Excellent durability and heat retention.

Processed at super high temperature of 1250° C three times in production and use of High heat resisting materials make ZEN COOK very durable for everyday use even in extreme thermal condition (thermal shock proof up to 400° C). Once heated, ZEN COOK retains heat very well keeping food warm for longer period, and it has superior resistibility against impact and cracking.

Healthy ZEN COOK!! How to use ZEN COOK for long period of time...

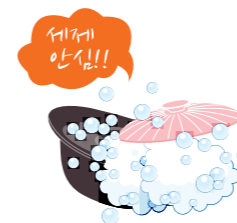

ZEN COOK Use and care instruction

1. Stop using if crack or chipping is found.
(Stop using cracked or chipped products can cause breakage resulting injury.)
2. Use cooking utensils made of soft material like silicone.

Important information

1. While cooking, use cooking glove to hold hot handle.
2. Be careful of impact applied to product.

Cleaning instruction

1. It is safe to use dishwashing detergent to clean ZEN COOK.
2. If heated pot is in contact with cold water, there is a possibility of damage.
Cool down first before cleaning.
3. Avoid using metallic scrub and/or abrasives which can cause scratch on surface.
Please use soft cloth or sponge to wash ZEN COOK with neutral detergent.
4. Please wash ZEN COOK separately from ceramic dinnerware

DO NOT heat ZEN COOK empty.
Be sure to heat it with contents.
It may cause breakage and/or shorten product's lifespan.

DO NOT use ZEN COOK for fry cooking
